Six bricks, each one adds a skill that fits the role: **planning**, **data**, **insights** and **cross-team collaboration**.

1 Foundation

Turkish Aerospace | Production Planning & Business Analyst Intern

May – Aug 2023

- Built machine learning models on BOM data to predict assembly line stoppages
- Automated manual scheduling and data collection

2 Dashboards

TurkTraktor | RPA Developer Intern

Jan – Apr 2024

- Built dashboards for operational performance tracking
- Automated repetitive processes with RPA (UiPath) using Agile methods

3 KPIs and reporting

Infinia | Product & Project Quality Engineer Intern

Sep – Dec 2024

- Collected and reported company-wide KPIs to the COO
- Prepared project documentation and ran internal audits

4 Decision support

HAVELSAN | Graduation Project Student

Jan – Apr 2025

- Built a decision-support application for humanitarian logistics
- Turned business needs into a MILP model (Python/Pyomo) and ALNS heuristic

5 Cross-team planning

ASELSAN | Project Planning Engineer

Sep 2025 – Aug 2026

- Planned milestones and deliveries for 100+ projects across engineering, production, procurement and customers
- Power BI, SQL, Python KPI dashboards; AI-supported SAP apps

6 Business edge

DTU | M.Sc. Industrial Engineering and Management

Sep 2026 – Jul 2028

- Business-oriented master's programme in Copenhagen
- B.Sc. Industrial Engineering, TOBB ETU (GPA 3.09 / 4.00)

How the bricks fit the role

The role: Editorial calendars and keeping teams in the loop

Milestone and delivery calendars for 100+ projects, shared across engineering, production and supply chain

The role: Spot trends and share insights

KPI dashboards and management reports in Power BI, Excel, SQL and Python

The role: Plan content that supports business goals

Business-focused M.Sc.; aligned priorities and trade-offs with commercial goals

The role: Work across teams

Coordinated procurement, production, project teams and customers in Europe and Asia

Toolbox and languages

Power BI

Excel

SQL

Python

SAP

UiPath

Pyomo

Agile

Lean

KPI tracking

Data analysis
